FLOOR TABLE NOTES

- Single span, uniform load.
- Total loads include live load, Mass Ply weight and 15 psf dead load.
- Live load deflection limit = Span (L)/360, total load deflection limit = L/240.
- Vibration controlled spans calculated using concepts outlined in the CLT handbook for a floor with no topping.
- When designing for vibration, use the vibration span for any loading condition that does not produce a span shorter than the vibration span.
